Carrer Objective

Motivated developer with a strong foundation in HTML, CSS, Bootstrap, JavaScript, React.js, Firebase, and Node.js. Eager to build scalable, responsive web applications and contribute to both front-end and back-end development. Committed to learning new technologies and writing clean, maintainable code in dynamic team environments.

Projects

Task Mate – Real-Time Task Management App

Task Mate is a real-time task management app built with **HTML, CSS, TailwindCss, JavaScript, React 19, Vite, Firebase and Node.js**, designed for seamless collaboration and efficient task handling. It features a secure, role-based authentication system that supports login for Users, Team Leads, and Team Members, powered by Firebase Authentication with both Google and Email login options. With a modular component structure, clean CSS styling, and responsive design, Task Mate offers a smooth, intuitive user experience across desktops, tablets, and mobile devices. The app also includes role-based access controls, allowing:

- Team Leads to create teams, assign tasks, and manage team members.
- Team Members to collaborate within teams and update task statuses.
- Users to manage personal tasks independently.

EduSpark – Interactive Learning Platform

EduSpark is an interactive learning platform built with **HTML, CSS, Tailwind CSS, Bootstrap, JavaScript, and Firebase**, designed to provide a dynamic and modern UI for learners. It offers:

- Real-Time Data Syncing & Secure Authentication:** Powered by Firebase, EduSpark ensures seamless user login and profile management, with real-time updates on learning progress and course content.
- Responsive Design Across Devices:** EduSpark guarantees an accessible, mobile-first learning experience with a responsive design, ensuring compatibility across both desktop and mobile devices for learners everywhere.
- Dynamic & Engaging Learning Experience:** JavaScript-powered interactivity enhances course content delivery, while Tailwind CSS and Bootstrap provide a visually consistent layout and flexible UI, fostering an engaging and personalized educational journey.

Neeman's Responsive Static website

Neeman's is a responsive static website crafted using **HTML and CSS, Bootstrap** designed to replicate the look and feel of modern e-commerce platforms. Built with a mobile-first approach, it ensures optimal viewing and interaction across all devices—desktops, tablets, and smartphones. The project emphasizes clean layouts, intuitive navigation, and a visually appealing user experience.

- Fully Responsive Design** – Ensures smooth adaptability and consistent layout across all screen sizes.
- Modern E-commerce Aesthetic** – Mimics the sleek, user-friendly interface of professional retail websites.
- Pure HTML & CSS Implementation** – Developed without JavaScript to demonstrate clean structuring and styling skills.
